

SitePod

making remote connections easy

- ***Are your staff across multiple locations?***
- ***Are communications with your head office a challenge?***
- ***Are IT resources at remote sites a premium?***
- ***Is there a lack of shared information across the organisation?***
- ***Is data security at site an issue?***
- ***Do you experience regular power outages, data loss or hardware problems?***

SitePod is a rapidly deployed remote IT unit producing high speed network and data connectivity between remote sites and head office. Even with basic internet links, SitePod can use your existing data link to connect site users to the head office. Your site people will be able to access your head office servers for networks, internal communication systems and corporate applications, with a similar experience to those that are physically located in the head office.

SitePod has a durable, self-contained and compact design that makes it a perfect solution for a range of applications unique to your organisation's operational requirements. It is ideal for deployment in remote businesses or regional areas as SitePod can be easily packed up and relocated.

Our product is:

- Fully customisable to your needs and requirements
- Easily deployed for immediate functionality
- Highly secure as it encrypts your data all the way back to the head office
- Adaptable for a broad range of deployment scenarios – from disaster recovery scenarios to temporary data centre
- Available on a cost effective buy or rental program

Multipro IT

TECHNICAL FEATURES

Integrated Threat Management

Recognised as the leader in its field, we use a fully configured threat management system, compliant with your corporate policy, to protect the company and each user's workstation. This includes:

- Firewall, Virtual Private Network (VPN) and Traffic Shaping
- Intrusion Prevention (IPS)
- Anti-Virus, Anti-Spyware, Anti-Malware
- Integrated Wireless Controller
- Application Control (Facebook, BitTorrent)
- Layer 2/3 routing

High-Speed Ethernet Gigabit Switch

48 high speed Ethernet power ports which allow the addition of workstations, printers and scanners. It includes:

- 4 x optional 10 Gbps Ethernet ports
- Power over Ethernet and Power over Ethernet plus
- 4 x dual personality port for optional fibre connectivity
- Quality of Service
- Layer 2 switching with VLAN support
- Layer 3 static routing and Routing Information Protocol (RIP)

Wide Area Network (WAN) Optimisation Controller

We use the world's leading built-in controller which increases the speed of access to head office, ensuring efficient use on-site. It accelerates disaster recovery protocols and a broad range of applications such as file sharing, Exchange & Outlook, Lotus Notes, web, MS SQL & Oracle.

Wireless Access Point

This incorporates swift wireless technology with user access rights pre-built featuring:

- 802.11n technology
- Integration with Unified Threat Management Wireless Controller
- Fully featured authentication, including WPA2 enterprise
- Power over Ethernet support

Uninterrupted Power Supply (UPS)

SitePod is connected to a double-online conversion UPS, with battery run-time and power protection.

- Upgradeable battery run-time, starting at 30 minutes
- Power protection for all devices inside the module

RENT OR BUY?

The Sitepod is designed as a robust and portable unit for remote sites, and therefore Multipro IT offer flexible terms. It is available to buy or we offer a cost effective pricing structure allowing for rent for short or extended periods. Rental agreements can be structured to allow for multiple site deployments. Whether purchased or rented, Sitepod goes through a mobilisation and demobilisation process which is dependent upon application and method of supply.

About Multipro IT

Established in 1989, Multipro IT is a fully integrated IT and Communications company offering Consulting & Advisory, Business Solutions, Projects and Managed Services across Western Australia. We provide innovative outsourcing that helps customers improve operational efficiencies and enable business advantage through quality and flexibility of its services.
